

Keep Students **Connected** on Your Terms

Trusted by School Districts Nationwide

D&S SmartSignal K-12 is a controlled cellular network system designed for schools and other secure environments. Instead of jamming signals, it redirects and filters mobile traffic so phones can connect – but only on your terms.

The Problem:

Cell phones are everywhere – but inside schools and secure buildings, they're becoming a growing risk. Students and visitors can:

- Access social media platforms (TikTok, Snapchat, etc.) during class
- Send texts or images that violate policy
- Coordinate disruptions or bullying in real time
- Evade supervision with encrypted apps and VPNs

Conventional signal jammers are illegal and device bans are difficult to enforce. SmartSignal changes that.

After the D&S Smart Signal Solution:

- School culture refocuses on learning
- Phones are restricted from social media and unauthorized messaging platforms.
- Maintains full access to 911 emergency services, as required by law.

Ideal for:

- School Districts
- Juvenile Detention Centers
- Testing Centers
- Courtrooms
- Secure Government Buildings

The D&S SmartSignal Solution:

We deploy a secure, building-wide system that allows phones to connect – but only on your terms.

- Redirects all mobile traffic
- Redirects SMS and MMS messaging
- Restricts access to social media, VPNs, and general web browsing
- Allows 911 emergency calls as required by law
- Integrates seamlessly with your existing infrastructure
- Enforces digital boundaries in classroom

Compliant. Safe. Built for Schools.

We don't jam signals – we redefine the environment by rerouting and filtering them using intelligent, carrier agnostic interception.
